

Assignment

- Download and install the opensource drm-tip kernel:
`git clone git://anongit.freedesktop.org/drm-tip`
- Download the intel-gpu-tools test utility:
`git clone https://anongit.freedesktop.org/git/xorg/app/intel-gpu-tools.git`
- Compile the igt test utility
- Understand the code and execute kms_setmode and kms_plane tests
- Try to hack the tests and flip a bmp image on screen.
- Note: Use any intel platform and monitor to try this, preferably above 8th Generation machines
